DISERA WAS ESTABLISHED IN 1996 AND AFTER 2003 BOTH PRODUCTION AND SALES ACTIVITIES HAVE BEEN INCREASED

Disera was established in 1996 and after 2003 both production and sales activities have been increased.

Investment in production started in 2004 and product portfolio consists of urine beakers, sharp boxes, vaginal speculum and petri dishes. In 2014 our production investment reached in a different stage by the evacuated vacuum tube production.

Vacusera evacuated blood collection tubes are the experience combined in diagnostic field and the production technology.

In 2014 we moved to our new factory building in Tire Organized Industrial Area, Izmir - TURKEY.

All products produced have the CE mark and the entire production operation is carried out in accordance with ISO 13485:2016 quality management systems.

OUR MISSION

Manufacturing eco-friendly and high quality products that are appropriate for principles of medical device regulation.

Creating customers who engage with our brand.

Providing the essential equipment which will render service to increase the standard of living and community health level.

OUR VISION

Being a medical device manufacturer with the highest market share and offering the variety of product range.

RESEARCH and DEVELOPMENT

Tracking innovations continuously and offering the most suitable products for customers.

PRODUCTION

Disera Tıbbi Malzeme Lojistik Sanayi ve Ticaret A.Ş having the knowledge and experience on providing quality and technical products in the medical sector, combined with the needs of the healthcare industry innovative product solutions and offers production activities according to the ISO 13485:2016 quality standards.

Vacusera Blood Collection Tubes are CE marked according to 98/79/EC In Vitro Diagnostic devices.

Vacusera Blood Collection Tubes are produced to the related standards of ISO 6710.

Vacusera Blood Collection Needles are CE certified and manufactured according to 93/42/EEC directives.

Consistent with a constantly updated technology infrastructure and experienced staff, and also the production quality assurance norms are shaped by different national and international guidelines provide the high quality level of products of DİSERA.

VACUSERA BLOOD COLLECTION SYSTEMS

In an increased automation environment in the diagnostic laboratory field and higher standards require a continuous performance of the blood collection systems. Vacusera Blood Collection Tubes, Vacusera Blood Collection Needles and Accessories are designed according to fulfill the requirements of blood collection procedures, patient's comfort and user's safety.

Vacusera Blood Collection Tubes are made of unbreakable PET tube, butyl rubber stopper and polyethylene cap. We offer medical paper labeled tubes and also transparent labeled tubes.

All components of Vacusera Blood Collection Systems improve patient's comfort, help safe and quality blood collection and also reliable test results.

VACUSERA BLOOD COLLECTION TUBES

Vacusera Blood Collection Tubes are made of unbreakable PET tube, butyl rubber stopper and polyethylene cap. We offer medical paper labeled tubes, transparent labeled tubes and also pre-barcoded tubes.

All components of Vacusera Blood Collection Systems improve patient's comfort, help safe and quality blood collection and also reliable test results.

VACUSERA SERUM CLOT ACTIVATOR TUBES

Vacusera Serum Clot Activator Tubes are used for clinical biochemistry and immunology. The inner wall of the Serum Clot Activator Tube is specially coated with clot activator, which activate coagulation process.

VACUSERA COAGULATION TUBES

Vacusera Coagulation Tubes are used for blood coagulation tests. Coagulation Tubes have a buffered sodium citrate solution of 0.109 mol/l (3.2%) or 0.129 mol/l (3.8 %). Double Tube technology provides an excellent condition for coagulation tests.
